

Dear FCC, Thank you for taking time to read my letter.
I would like to say that I am in support of XM's Satellite Radio. We have chosen not to have Satellite T.V. and this is a great option to us as we like to stay up on current events. Also the weather programs especially in rural communities such as ours is very helpful. We feel it should be our choice as consumers to make decisions as to what we want to hear. So in closing we would like to ask you to reject NAB's petition 04-160.
Thank You for your time,

Robert and Eleanor Turney
